

2Q 2022

Investment Objective: Balanced Growth

Primary objective is long-term capital appreciation, with income generation as a secondary consideration. The Fund is willing to assume moderate to high risk commensurate with the expected returns.

Investment Strategy

The strategy has employed a disciplined investment approach focused on a concentrated portfolio of durable, well-managed, high quality, competitively-advantaged businesses that we aim to own at attractive prices. Our success will be defined by generating strong absolute returns and outperforming in down markets, which together we believe position us to deliver excellent performance relative to our respective benchmarks over a full economic cycle.

The strategy will generally hold dollar denominated equities headquartered in North America, as well as in certain global firms located in other developed regions. The strategy will also invest in a well-diversified portfolio of U.S. high-quality fixed income instruments, including corporate debt, asset-backed securities, commercial mortgaged-backed securities, agency mortgage-backed securities, and select municipal obligations.

All the securities included in the strategy go through a rigorous bottom-up investment process and criteria. We believe companies that meet our demanding investment criteria are better positioned to withstand periods of economic or financial market weakness and compound capital at attractive rates over time.
