

3Q 2024

Investment Objective

The primary objective is to provide maximum total return, consistent with the preservation of capital, prudent investment management, the maintenance of liquidity and interest rate risk.

Investment Strategy

VBT Liquidity Fund is composed of two funds:

-BBH Short Duration Fund: primarily used as a liquid reserve, seeks to provide investors with maximum total return, with a focus on capital preservation.

-Structured Fixed Income Strategy: delivers secondary liquidity needs, generating above-market performance for investors seeking the attractive risk/return characteristics of the structured securities market. It invests in asset-backed securities, commercial mortgage-backed securities, agency mortgage-backed securities, secured corporate debt, and select collateralized loan obligations.

This combination will provide a greater chance of obtaining higher yields while maintaining its current interest rate risk.

Cumulative fund performance (%)

Mutual fund	YTD	3 Month	1 Year	2023	Since Inception*
